Matching products will be added to this catalogue This text will prefix the description of matching products

Changes made here will not be visible until tomorrow

- ❖ Include 9-coded items in the Customer Owned catalogue.
- ❖ Recycling API - it is now possible to specify the preferred courier for a collection.
- ❖ Recycling API - a new end point, listCollectionCouriers, will return a list of couriers.
- ❖ Recycling API - when creating a Collection Request, clear any requested collection dates which are in the past.
- ❖ New Feature: large imports may now be done in the background.

Cost Centre Import

**Options**

Options:  Process import in background  
Large files take time to process: ticking this will upload the file and process it later (required for more than 100 records)

**Preview Data**

3 valid records

Code	Description
a	aa
b	bb
c	cc

- ❖ Recycling API - a new end point, unitStatus, will list the current status of an asset.
- ❖ Recycling - give additional information about Asset Tracked collections to help the user make a choice if it is required.

The screenshot shows the 'Item Breakdown' form with the following elements:

- Header: 'Item Breakdown' and 'No items'.
- Buttons: 'Delete All Items...', 'Download Template', 'Import Items...', and 'Add Item...'.
- Message: 'This collection request contains no items'.
- Form field: '\* Is this an Asset tracked collection?' with radio buttons for 'Yes' and 'No'.
- Warning box: '⚠ Please choose if the courier will check each serial/asset number before loading the equipment onto the van (not available with DPD)'.

The screenshot shows the 'Item Breakdown' form with the following elements:

- Header: 'Item Breakdown' and 'No items'.
- Buttons: 'Delete All Items...', 'Download Template', 'Import Items...', and 'Add Item...'.
- Message: 'This collection request contains no items'.
- Form field: '\* Is this an Asset tracked collection?' with radio buttons for 'Yes' and 'No', where 'Yes' is selected.
- Information box: 'ℹ The courier will check each serial/asset number before loading the equipment onto the van - please check this is the service you require (not available with DPD)'.

- ❖ Bonded Rollup - items with 0 free stock but which have on order stock can now be added to baskets.
- ❖ Order API - reject any order requests which contain no items.

#### Bug Fixes:

- ❖ Ensure that an item in a basket can have a maximum quantity of 9,999.
- ❖ Recycling API - ensure database connections are closed properly after performing actions.
- ❖ Ensure users are prompted about including a symbol in their new password when doing a password reset.
- ❖ Ensure Bonded Rollup codes are included in the Customer Owned catalogue.
- ❖ Rollout - additional error handling on custom user export to Excel.
- ❖ Ensure that password reset emails have the correct lifecycle.scc.com address.

#### Other:

- ❖ Recycling - importing items into a Collection Request is now faster.
- ❖ Minor changes to better support cXML Level 2 Punchout.
