

# Lifecycle 8.3.4

Release Note

## Lifecycle 8.3.4 release note

Below is a summary of what is included in this latest release:

### New Features:

- ❖ Recycling - when importing CRs, blank phone numbers will be replaced with 'N/A'
- ❖ Rollout - user export will now present times in 24 hour format.
- ❖ Bonded Projects has been renamed to Customer Projects and may now include non-Bill & Hold items.
- ❖ User setup - an administrator can now clear the MFA credentials for a user.

The screenshot shows a user setup interface with two tabs: 'Password' and 'Summary'. To the right of the tabs are several buttons: 'Save Password Option...' (blue), 'Notify user' (white with dropdown arrow), 'Clear MFA Token...' (grey), 'Login as user' (grey), and 'Tools' (white with dropdown arrow). Below the tabs is a large grey rectangular area, likely a form or data display.

- ❖ Orders - the serial number list on an order will now show the description of the item.

The screenshot shows a table titled 'Serial Numbers' with a search bar and pagination controls. The table has four columns: Delivery, Part Number, Serial Number, and Badge Number. There is one entry in the table.

Delivery	Part Number	Serial Number	Badge Number
S99511F	5PTMS001 HP EliteBook 835 G8 Notebook - 13.3" - AMD Ryzen 5 Pro - 5650U - 0 GB RAM	5CG1388J71	28424

Show 10 entries

- ❖ Web services - the OrderStatus web service now returns the description, category and manufacturer of each item (where available).
- ❖ Web services - the recycling end points for requestStatus, unitStatus and listRequests will now return a URL where any destruction or sanitisation certificates for a unit can be printed or downloaded.
- ❖ Web services - the recycling list (listRequests) now returns the Units for each request (if present)
- ❖ Catalogue - if a user has access to purchase a Rollup code, they will automatically be able to buy any of the components of the rollup code even if they don't have access to the component.

- ❖ Order - any order processing emails listed in the order history can now be viewed by clicking on the envelope icon.

Close

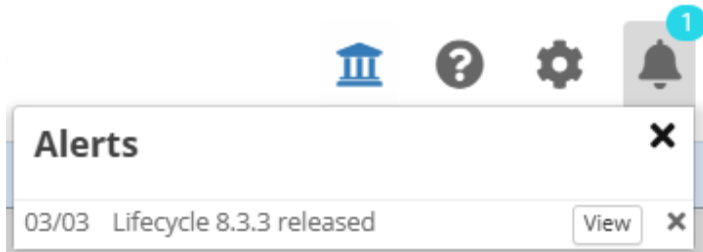

- ❖ Rollout - certain emails can now be viewed from the user's order history.

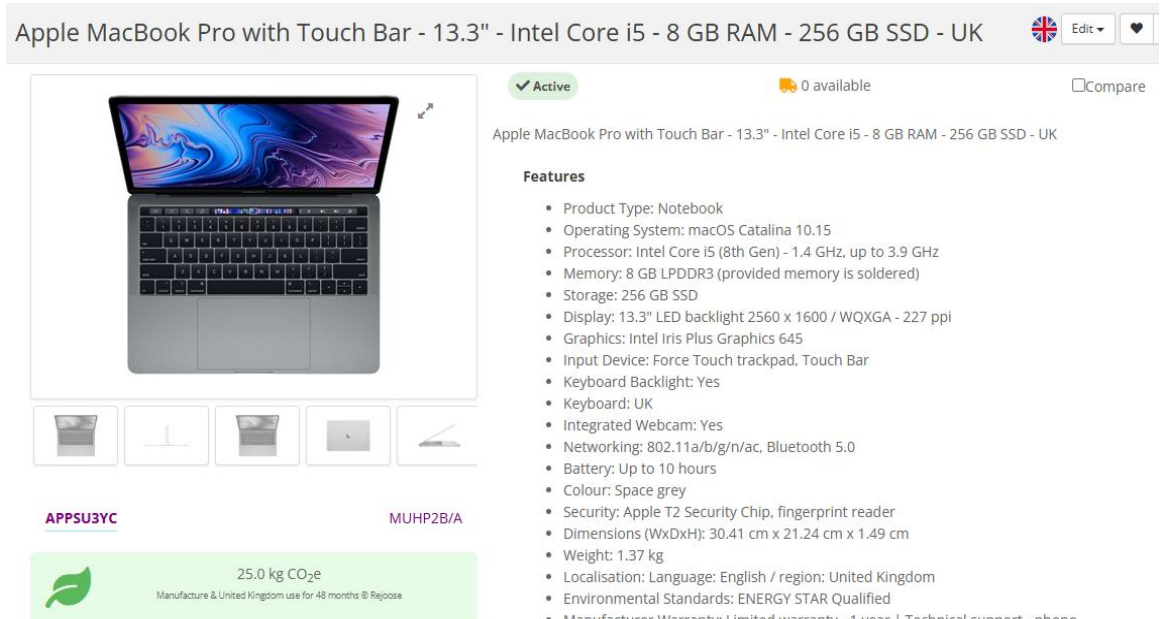

- ❖ Rollout - when moving or deleting users from a deployment, a filter by first letter of the user's surname has been added to assist with deployments with a large number of users.

- ❖ Other - the user alert menu will now notify users of system releases.

- ❖ Catalogue - support for Rejoose carbon emission data has been added. This will be slowly rolled out across selected UK product ranges.

- ❖ Catalogue - a customer catalogue can now be fixed as a monthly or quarterly Price List which will hold the items and pricing for the specified period. This Price List may be viewed on screen or downloaded to Excel.

### Bug Fixes:

- ❖ Web Service - carry out additional checks to ensure that correct data has been passed to the createOrder web service (currency, order account, etc).
- ❖ Web Service - calls to the requestStatus end point for Collection Requests will no longer error.
- ❖ Orders - hide the link to the PDF invoice for zero-value orders as no PDF file is produced.
- ❖ Orders - if the checkout page is set to allow the delivery contact's details to be manually entered, make sure the setting to default to the current user enters the details correctly.
- ❖ Rollout - ensure that notifications can be sent when all users in the deployment are at status 'Welcome Sent'.
- ❖ Orders - if an image build is selected on an order, ensure the image build code appears in the WHS text.
- ❖ Orders - any custom PO name will be correctly shown on the checkout page.

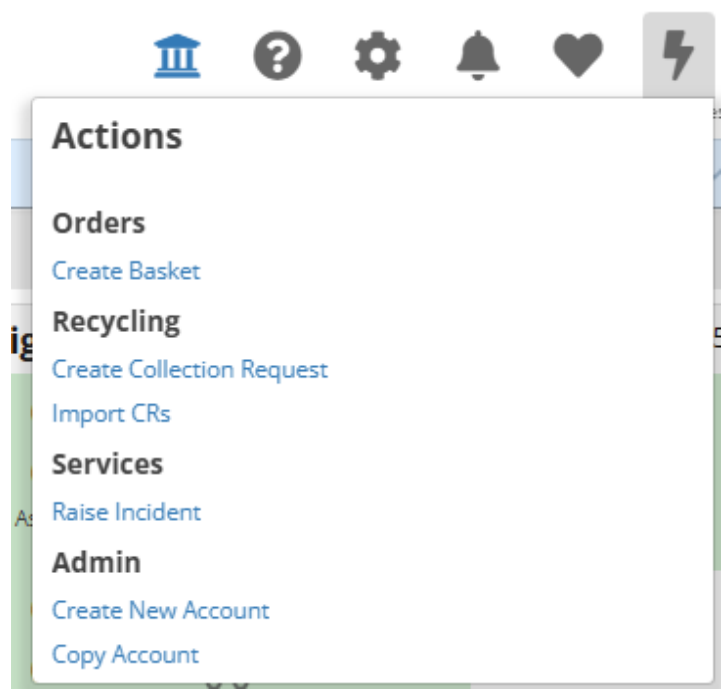

Order Details

Description Order	* Invoice Account A0706LC - AIBL Consolidated - PLEASE USE FOR. ▾	* Service Now Ticket
* Order Type DPD Delivery Pre 10:30 ▾	* Employee ID	

**Other:**

- ❖ Recycling - Import CRs will now show on the user's action menu (if enabled for the user)
